

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Maj Invest Global Value Equities

Legal entity identifier: 5299006XINKIRZM4WN76

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective:** ____%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promotes environmental and social characteristics through exclusions, ESG integration, and active ownership.

The fund excludes companies engaged in activities listed under “Investment Strategy” and integrates ESG factors into the investment process through an ESG Risk Rating. This rating assesses companies’ exposure to and management of ESG risks. Companies with lower ratings are considered to have fewer unmanaged risks and are thus better at integrating ESG risks and opportunities into their operations.

Additionally, the mandate exercises active ownership with companies that violate, or are at risk of violating international norms. This engagement is conducted through the third-party provider, Sustainalytics.

The environmental and social characteristics are monitored through the indicators disclosed in the pre-contractual information and reported on annually in the periodic report.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

Using the Sustainalytics ESG Risk Rating to measure the attainment of the environmental and social characteristics.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

Not applicable

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, _____

The fund takes into account the principal adverse impacts of its investment decisions on sustainability factors, including the PAI indicators listed in Table 1 of Annex I under the EU's Regulatory Technical Standards (RTS), as well as selected indicators from Tables 2 and 3.

No

What investment strategy does this financial product follow?

The fund invests in stocks that are characterized as being undervalued relative to the companies' underlying fundamental and business value. The fund's objective is to generate returns that, over time, exceed market returns as measured by the broad global index. The fund follows a highly focused investment approach, holding 25-35 stocks, making it more volatile than traditional global equity funds.

The fund's environmental and social objectives are achieved through its commitment to responsible investment, as described in the investment advisor, Maj Invest's, Responsible Investment Policy and ESG Investment Framework.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

Exclusions

The fund excludes companies engaged in unsustainable activities, including:

- Companies deriving more than 10 pct. of their revenue from oil sands exploration and extraction.
- Companies deriving more than 10 pct. of their revenue from thermal coal exploration and extraction.
- Companies deriving more than 10 pct. of their revenue from the production and cultivation of tobacco products.
- Companies deriving more than 10 pct. of their revenue from the production of adult entertainment content.
- Companies deriving more than 10 pct. of their revenue from the ownership or operation of gambling establishments.
- Companies involved in controversial weapons activities (as defined by international treaties and conventions).
- Companies that have violated international standards such as the UN Global Compact and OECD Guidelines, demonstrating no willingness to change their behaviour despite repeated engagement efforts, and are therefore placed on the Sustainability disengagement list.

ESG Integration

Companies are assessed on their exposure to ESG risks and the effectiveness of their risk management across 22 key topics and over 40 indicators. Additionally, adverse impacts on sustainability factors are evaluated based on PAI indicators covering environmental and social aspects.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Active Ownership

The mandate exercises active ownership with companies that violate, or are at risk of violating international norms. This engagement is conducted through the third-party provider, Sustainalytics.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not Applicable

- **What is the policy to assess good governance practices of the investee companies?**

Assessing good governance practices is ensured through Maj Invest's Responsible Investment Policy and involves norm-based screening in collaboration with Sustainalytics. The screening evaluates whether companies comply with internationally recognised norms and standards concerning environmental, social, and governance (ESG) issues, including the UN Global Compact and OECD Guidelines for Multinational Enterprises. It identifies companies that violate or risk violating these norms. The screening includes an assessment of factors such as labour conditions, management practices, compliance with human rights, and remuneration policies.

The investment advisor, Maj Invest's Responsible Investment Policy, is available on the website.

What is the asset allocation planned for this financial product?

100 pct. of the fund's investments meet the criteria in the investment advisor, Maj Invest's ESG integration strategy and are aligned with other environmental and social characteristics. This is ensured through the binding elements of the investment process, including exclusions, ESG integration, and active ownership.

The table below presents the minimum share of investments in the fund contributing to the achievement of the environmental and social characteristics promoted by the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

Asset allocation describes the share of investments in specific assets.

- Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Not Applicable

- **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

None

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What is the minimum share of investments in transitional and enabling activities?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable

What is the minimum share of socially sustainable investments?

Not applicable

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Not applicable

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable

- ***How does the designated index differ from a relevant broad market index?***

Not applicable

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable
